

**27th November**

**Seminar Hall, Hall 102 to 104 and Halls 201 to 206 at UIAMS (Management institute)**

**Halls lecture hall 1 and 2 in nuclear physics department**

| 5  | Hall 302<br>SESSION A | 985  | Dr AMAN TIWARI         | THE VENEER FILES: CASE CLOSED WITH CONFIDENCE                                                                                                                                                |
| 6  | Hall 302<br>SESSION A | 272  | Dr MUSKAN CHAUDHARI    | "Comparative Evaluation of pH, Setting Time and Solubility of MTA and MTA incorporated with Gold Nanoparticles (MTA-AuNPs)"                                                                  |
| 7  | Hall 302<br>SESSION A | 1071 | Dr SHAILEE CHANDAK     | Smile Makeovers with Direct Composites: Case Based Insights                                                                                                                                  |
| 8  | Hall 302<br>SESSION A | 300  | Dr Hemalatha Siyyadri  | Evaluation of colour change and protein denaturation on tooth surface induced by plasma activated distilled water as a novel bleaching agent-An Invitro study                                |
| 9  | Hall 302<br>SESSION A | 1283 | Dr SRAVANI PEERLAGUDEM | "Pixels of Whitening: A Digital Analysis of Shade Change in Two In-Office Bleaching Systems"                                                                                                 |
| 10 | Hall 302<br>SESSION A | 629  | Dr VENKATA NEELI       | •The Smile Blueprint: For a customized smile make over• Esthetic Rehabilitation Through Periodontal and Conservative Collaboration- a case series                                            |
| 11 | Hall 302<br>SESSION A | 844  | Dr GREESHMA A          | Effect of Whitening Mouth Rinse and Bleaching Techniques on Enamel Color, Microhardness, and Mineral Content Under pH Cycling: An In Vitro Study                                             |

**SESSION A 9:00-11:00 AM**

|   |                       |      |                   |                                                                                                                                                                         |
|---|-----------------------|------|-------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Hall 303<br>SESSION A | 192  | Dr Nikita Gupta   | A SPECTROPHOTOMETRIC ANALYSIS TO CHECK TOOTH DISCOLORATION WITH MTA-CEM, BIO-C-REPAIR AND BIOAGGREGATE IN HEMORRHAGIC AND NON- HEMORRHAGIC CONDITIONS-AN IN-VITRO STUDY |
| 2 | Hall 303<br>SESSION A | 1421 | Dr NAMRATA SHIROL | Bright & Bioactive: Enhancing Bleaching Efficiency and Enamel Protection Using Chitosan Nanoparticles                                                                   |

|    |                       |      |                          |                                                                                                                                                                                                   |
|----|-----------------------|------|--------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 3  | Hall 303<br>SESSION A | 633  | Dr LAKINANI<br>YASHASVEE | Comparative Efficacy of Topical 10%Pregabalin and 1%Ibuprofen Gels in Managing In-Office Bleaching-Induced Tooth Sensitivity: A Randomized Controlled Clinical Trial                              |
| 4  | Hall 303<br>SESSION A | 113  | Dr SANCHITA<br>GANGULY   | Comparative Evaluation of the Shear Bond Strength of Dentin Replacement Materials to Resin-Based Composite: An In-Vitro Study                                                                     |
| 5  | Hall 303<br>SESSION A | 556  | Dr Anusha Saxena         | “Clinical evaluation of light cured Glass ionomer cement versus resin-modified glass ionomer cement in class V carious and non-carious lesions: A randomized comparative study”                   |
| 6  | Hall 303<br>SESSION A | 436  | Dr Jasmitha Chapati      | Comparative Evaluation of 35% Hydrogen Peroxide with Remineralizing Agents on Enamel Microhardness “ An In Vitro Study                                                                            |
| 7  | Hall 303<br>SESSION A | 1374 | Dr Shashank<br>Bhandekar | Effect of Horizontal and Vertical Position of Fiber Post Placement on Fracture Resistance in Endodontically Treated Molars with a MOD Preparation “ An In Vitro Study                             |
| 8  | Hall 303<br>SESSION A | 1222 | Dr BODICHERLA REKHA      | Comparison between the effect of adding micro hydroxyapatite and calcium deficient hydroxyapatite on surface roughness and microhardness of resin modified and conventional glass ionomer cements |
| 9  | Hall 303<br>SESSION A | 1099 | Dr ANIMESH MOGAL         | Comparative evaluation of calcium ion release and microhardness of three different indirect pulp capping agents at different time intervals: an in-vitro study.                                   |
| 10 | Hall 303<br>SESSION A | 227  | Dr Somya Kumari          | MANAGMEN OF GROSSLY CARIOUS TOOTH                                                                                                                                                                 |
| 11 | Hall 303<br>SESSION A | 428  | Dr abhilasha malhotra    | Bioceramics: The Future of Pulp Protection                                                                                                                                                        |

**SESSION A 9:00-11:00 AM**

|    |                       |      |                                     |                                                                                                                                                                   |
|----|-----------------------|------|-------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1  | Hall 304<br>SESSION A | 431  | Dr<br>MANGAIYARKKARASI<br>RAJADURAI | Evaluation of the Depth of penetration and Hardness of Simvastatin as pulp capping biomaterial “ An invitro study”                                                |
| 2  | Hall 304<br>SESSION A | 142  | Dr Vidula Bhandary                  | “Antioxidants to the Rescue: BHT vs. Sodium Ascorbate in Preserving Bond Strength”                                                                                |
| 3  | Hall 304<br>SESSION A | 861  | Dr Rhea Sahdev                      | Comparative Accuracy of Four Intraoral Scanners in Designing Endocrowns- Assessment of Fit and Pull-Out Bond Strength: An In Vitro Study                          |
| 4  | Hall 304<br>SESSION A | 1267 | Dr Yogini Shekhawat                 | Stabilizing Fractures with Fibers: Clinical Insights from a Case Series                                                                                           |
| 5  | Hall 304<br>SESSION A | 623  | Dr Anjali Chandane                  | "Survey on the Use and Perception of Bioactive Restorative Materials in Conservative Dentistry Among Dental Practitioners"                                        |
| 6  | Hall 304<br>SESSION A | 479  | Dr Suryaja Adhikari                 | Antioxidant, Anti-inflammatory, and Antibiofilm Potential of Aspartic Acid Functionalized PCL-NHA Scaffolds                                                       |
| 7  | Hall 304<br>SESSION A | 418  | Dr MEHUL GONDALIYA                  | Comparative Evaluation of Tooth Discoloration Induced by Conventional and Gold Nanoparticle-Enhanced Mineral Trioxide Aggregate.”                                 |
| 8  | Hall 304<br>SESSION A | 802  | Dr Shivanjali<br>Chatterjee         | A COMPARATIVE EVALUATION OF SHEAR BOND STRENGTH BETWEEN NORMAL DENTIN AND CARIES-AFFECTED DENTIN USING NEWER GENERATION DENTIN BONDING AGENTS : AN IN VITRO STUDY |
| 9  | Hall 304<br>SESSION A | 1379 | Dr ADEELA FARHAN P                  | Effect of Saliva Substitute on Microhardness of Enamel : An Invitro Study                                                                                         |
| 10 | Hall 304<br>SESSION A | 488  | Dr NAMRATA PATIL                    | An Invitro Investigation comparing Fracture resistance of Re-attached teeth following Pre-treatment with various Re-mineralizing agents.                          |

|                                |                       |      |                              |                                                                                                                                                                                   |
|--------------------------------|-----------------------|------|------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 11                             | Hall 304<br>SESSION A | 202  | Dr ABOLI CHAPLE              | EFFECT OF CHEMICAL CROSS-LINKERS ON DENTINE BIOMODIFICATION OF RESIN-DENTINE BOND: AN IN VITRO SHEAR BOND STRENGTH STUDY                                                          |
| <b>SESSION A 9:00-11:00 AM</b> |                       |      |                              |                                                                                                                                                                                   |
| 1                              | Hall 305<br>SESSION A | 651  | Dr VIJIT MODI                | The Effect of Diode Laser on The Bond Strength of Universal Adhesives to Human Dentin – An In Vitro Study                                                                         |
| 2                              | Hall 305<br>SESSION A | 631  | Dr SRAVANTHI BODA            | COMPARATIVE ANALYSIS OF PHOTODYNAMIC AND SONODYNAMIC DISINFECTION ON THE BOND STRENGTH OF CARIES-AFFECTED DENTIN USING RESIN MODIFIED GLASS IONOMER CEMENT - AN IN-VITRO STUDY    |
| 3                              | Hall 305<br>SESSION A | 742  | Dr Dhwarka Mai               | Evaluation of the Effect of Astaxanthin on immediate Shear Bond Strength of Bleached Enamel                                                                                       |
| 4                              | Hall 305<br>SESSION A | 1322 | Dr Ashna K                   | COMPARATIVE EVALUATION OF BOND STRENGTH AND FAILURE MODE ANALYSIS OF RESIN COMPOSITE BONDED TO ENAMEL AFTER REMINERALIZATION BY DIFFERENT REMINERALIZING AGENTS:AN INVITRO STUDY. |
| 5                              | Hall 305<br>SESSION A | 415  | Dr M Manisha Chouhan         | The Effect of Pre-Endodontic Immediate Dentin Sealing on Microtensile Bond Strength of Mandibular Molars Restored with Universal Bonding Agent – An In Vitro Study                |
| 6                              | Hall 305<br>SESSION A | 561  | Dr Sakshi Varshney           | “Effect of Natural Collagen Cross-linker Hesperidin on Shear Bond Strength of Nanohybrid Composite under Blood and Saliva Contamination- an invitro study”                        |
| 7                              | Hall 305<br>SESSION A | 168  | Dr Yash Dawani               | "Enhancing Dentin Adhesion: A Comparative Study of Adhesive Performance Post-Diode Laser Conditioning"                                                                            |
| 8                              | Hall 305<br>SESSION A | 226  | Dr SWETHA RAJASEKARAN        | COMPARATIVE EVALUATION OF SODIUM ASCORBATE AND TROLOX ON THE SHEAR BOND STRENGTH OF COMPOSITE RESIN TO BLEACHED ENAMEL – AN IN VITRO STUDY                                        |
| 9                              | Hall 305<br>SESSION A | 868  | Dr Awale Akami               | ASSESSMENT OF MICROLEAKAGE IN CLASS III CAVITY USING CBCT AND DYE PENETRATION - AN IN VITRO STUDY                                                                                 |
| 10                             | Hall 305<br>SESSION A | 434  | Dr JOICE ALEXANDER           | COMPARATIVE EVALUATION OF THE EFFECT OF DIFFERENT COLLAGEN CROSS LINKING AGENTS ON SHEAR BOND STRENGTH OF NANOCOMPOSITE TO DEEP DENTIN: AN IN-VITRO STUDY                         |
| 11                             | Hall 305<br>SESSION A | 309  | Dr AMULYA L                  | "Bleach, Bond, and Beyond : The Antioxidant solution"                                                                                                                             |
| <b>SESSION A 9:00-11:00 AM</b> |                       |      |                              |                                                                                                                                                                                   |
| 1                              | Hall 306<br>SESSION A | 1469 | Dr bhuvaneshwar reddy        | To assess the influence of minocycline pretreatment and incorporation of minocycline into the adhesive on the bond strength of composite resin, via an in vitro analysis.         |
| 2                              | Hall 306<br>SESSION A | 1159 | Dr Mrunal Matle              | Contamination Challenges: Impact of Saliva, Blood, and Latex Glove on the Performance of Eighth-Generation Adhesive System                                                        |
| 3                              | Hall 306<br>SESSION A | 998  | Dr Kothakota Partha Sai      | Jackpot with jackfruit                                                                                                                                                            |
| 4                              | Hall 306<br>SESSION A | 443  | Dr MEEDIVEMULA MADHAVI LATHA | Efficacy Of Epigallocatechin Gallate and Chlorhexidine as Pretreatment Liners Before Composite Restorations Using FDI Criteria -A Randomized Clinical Trial                       |
| 5                              | Hall 306<br>SESSION A | 1262 | Dr Tamilselvan K             | Comparative Evaluation of Fracture Resistance of Type IX GIC, Silver Reinforced GIC, Hydroxyapatite-Modified GIC, and Sandwich Technique Restorations – An In Vitro Study         |
| 6                              | Hall 306<br>SESSION A | 701  | Dr AMEESHA RAI               | Mysticus fragrans Phytochemical as a Natural Approach to Dentin Biomodification: An In Vitro Study                                                                                |
| 7                              | Hall 306<br>SESSION A | 997  | Dr PATIL KANTHI KIRAN REDDY  | Comparative Evaluation of Degree of Conversion, Cytotoxicity, and Microhardness of Self-Etch and Universal Adhesives                                                              |

| 8  | Hall 306<br>SESSION A | 875  | Dr ADITYAKUMAR PISE | COMPARISON OF THE SHEAR BOND STRENGTH OF TWO DIFFERENT RESTORATIVE MATERIALS TO BIODENTINE, THERACAL PT , NANOMATERIAL- FILLED MTA AND CONVENTIONAL MTA                                |
| 9  | Hall 306<br>SESSION A | 1156 | Dr G.SANJANA REDDY  | COMPARATIVE EVALUATION OF SHEAR BOND STRENGTH AND FRACTURE MODE ANALYSIS OF A BIOACTIVE MATERIAL TO THREE DIFFERENT RESTORATIVE MATERIALS.                                             |
| 10 | Hall 306<br>SESSION A | 1427 | Dr ANSAR .          | Effect of different time intervals after diode laser desensitization on the shear bond strength of resin cement to dentin in an in-vitro study.                                        |
| 11 | Hall 306<br>SESSION A | 906  | Dr MEGHA VASU NAIK  | INFLUENCE OF PHOTODYNAMIC AND SONODYNAMIC DISINFECTION ON THE BOND STRENGTH OF CARIES AFFECTED DENTIN BONDED BY TWO DIFFERENT TOOTH COLORED RESTORATIVE MATERIAL: A COMPARATIVE STUDY. |

**SESSION B 11:00 AM- 1:00 PM**

|    |                       |      |                              |                                                                                                                                                                                                          |
|----|-----------------------|------|------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1  | Hall 301<br>SESSION B | 295  | Dr Lasya Genji               | Influence Of Quercetin Enhanced Hydrogen Peroxide Bleaching On Post Bleaching Enamel Composite Bond Strength : An Invitro Study                                                                          |
| 2  | Hall 301<br>SESSION B | 291  | Dr MITRATA GANTAIT           | "WHEN GINGIVAL WIDTH VARIES" -SHEAR BOND STRENGTH COMPARISION OF POSTERIOR CLASS V RESTORED CAVITIES- AN IN VITRO STUDY                                                                                  |
| 3  | Hall 301<br>SESSION B | 1396 | Dr RAKSHA TAPADIYA           | "Antibacterial Potential of a Drug-Incorporated Self Etch Adhesive " An In Vitro study"                                                                                                                  |
| 4  | Hall 301<br>SESSION B | 1277 | Dr Ninganagoud Biradar       | Effect of Remineralising Agents and Flowable Composites on the Fracture Resistance of Reattached Tooth Fragments: An In Vitro Study.                                                                     |
| 5  | Hall 301<br>SESSION B | 1359 | Dr AARYA B                   | Comparative Evaluation of Shear Bond Strength Between a Two-Step Universal Adhesive, a Single-Step Universal Adhesive and a Single-Step Universal Adhesive with Resin Coat on Dentin : An In Vitro Study |
| 6  | Hall 301<br>SESSION B | 277  | Dr MUSKAN AGRAWAL            | Mouthrinses and Resin Composites: A Study of Microhardness Changes                                                                                                                                       |
| 7  | Hall 301<br>SESSION B | 1522 | Dr Aryan Desai               | Influence of Polishing Timing on Marginal Microleakage of Nanohybrid and High-Viscosity Bulk-Fill Composites in Class 5 Cavities: An In-Vitro Study.                                                     |
| 8  | Hall 301<br>SESSION B | 468  | Dr Dhrub Mukherjee           | AN INVITRO EXPERIMENT TO STUDY THE INFLUENCE OF BIOCERAMIC SEALER RESIDUE ON THE BOND STRENGTH BETWEEN DENTIN AND COMPOSITE RESIN USING THREE DIFFERENT BONDING TECHNIQUES                               |
| 9  | Hall 301<br>SESSION B | 1280 | Dr Ellannagari Shravya Reddy | Bond Stability Boost: Effect of Natural Collagen Cross Linkers on Etched Dentin                                                                                                                          |
| 10 | Hall 301<br>SESSION B | 707  | Dr SHIVANGGI BHANOT          | Comparative Evaluation of Four Antioxidants on Shear Bond Strength of Composite Resin to Enamel Following Extra-Coronal Bleaching                                                                        |
| 11 | Hall 301<br>SESSION B | 781  | Dr Neehar Sai Kiran Pendem   | EFFECT OF DIFFERENT CONCENTRATIONS OF FUMARIC ACID AND TANNIC ACID ON SMEAR LAYER REMOVAL AND RESIN TAG FORMATION ON CORONAL DENTIN: AN INVITRO STUDY.                                                   |

**SESSION B 11:00 AM- 1:00 PM**

|   |                       |     |                           |                                                                                                             |
|---|-----------------------|-----|---------------------------|-------------------------------------------------------------------------------------------------------------|
| 1 | Hall 302<br>SESSION B | 732 | Dr CHEVIREDDY SAI MEGHANA | Remineralization of Dentin with Proanthocyanidin and Dentin Matrix: An SEM/EDX and Microhardness Evaluation |
|---|-----------------------|-----|---------------------------|-------------------------------------------------------------------------------------------------------------|

|    |                       |      |                             |                                                                                                                                                                                                                                                                                                                                                      |
|----|-----------------------|------|-----------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 2  | Hall 302<br>SESSION B | 1102 | Dr Pranjali singh           | Radiotherapy-Induced Alterations in Salivary Urease Activity: An Evaluation of Short- and Long-Term Outcomes                                                                                                                                                                                                                                         |
| 3  | Hall 302<br>SESSION B | 278  | Dr Lija T J                 | Battle of the composites: Reinforcing endodontically treated teeth                                                                                                                                                                                                                                                                                   |
| 4  | Hall 302<br>SESSION B | 294  | Dr MOHIT KUMAR<br>JYOTIYANA | Assessing the quality of restoration using Smart Dentin Replacement+ and Tetric N Ceram done in Class I pits and fissure caries using Bulk fill and Incremental Technique-An In vivo Study                                                                                                                                                           |
| 5  | Hall 302<br>SESSION B | 334  | Dr Purva Butala             | Comparative evaluation of post-operative sensitivity with self-etch and etch and rinse adhesive systems in non-carious cervical lesions restored using composite resins- A systematic review and meta-analysis                                                                                                                                       |
| 6  | Hall 302<br>SESSION B | 728  | Dr Robin Mathew<br>James    | : Comparative Evaluation of Remineralizing potential of A Herbal Agent with Conventional CPP-ACP and Novamin on Artificially Demineralized Human Enamel.                                                                                                                                                                                             |
| 7  | Hall 302<br>SESSION B | 351  | Dr Sandhya Meena            | Macroscopic and Histological Correlation of Deep and Extremely Deep Carious Lesions: A Pilot Study                                                                                                                                                                                                                                                   |
| 8  | Hall 302<br>SESSION B | 499  | Dr Tasmiya Bhavikatti       | Effect of Er: YAG laser conditioning on the adhesion of Actinomyces viscosus after root surface debridement: an in vitro study                                                                                                                                                                                                                       |
| 9  | Hall 302<br>SESSION B | 1188 | Dr Sneha Menghwani          | Comparative evaluation of efficacy of 2% Chlorhexidine Solution versus Tulsi Leaves (Ocimum sanctum) and Avocado Seed (Persea americana) Extract, as a Cavity disinfectant against Streptococcus mutans and Lactobacillus in Class I deep carious mandibular first and second molars of patients aged 18 to 50 years –A Randomized Controlled trial. |
| 10 | Hall 302<br>SESSION B | 741  | Dr ANWESHA<br>PATTNAIK      | Comparison of remineralizing potential of nanohydroxyapatite, calcium sucrose phosphate and CPP-ACP on demineralized enamel: An in vitro experimental study using SEM EDX.                                                                                                                                                                           |
| 11 | Hall 302<br>SESSION B | 614  | Dr THARANI S J              | Purmorphamine-Loaded Glass Ionomer: A Novel approach to drive odontogenic signalling on root dentin                                                                                                                                                                                                                                                  |

**SESSION B 11:00 AM- 1:00 PM**

|   |                       |     |                                           |                                                                                                                                                                                        |
|---|-----------------------|-----|-------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Hall 303<br>SESSION B | 650 | Dr Indrayani Amale                        | Evaluation of Shade Matching of Monochromatic Versus Polychromatic Layering Techniques in Restoration of Fractured Incisal Angle of Maxillary Incisors: A Randomized Controlled Trial. |
| 2 | Hall 303<br>SESSION B | 866 | Dr HIMANSHU GOYAL                         | EVALUATION OF MICROLEAKAGE IN CLASS V COMPOSITE RESTORATION USING FOUR DIFFERENT TYPES OF ETCHING TECHNIQUES: A STEREOMICROSCOPIC STUDY                                                |
| 3 | Hall 303<br>SESSION B | 314 | Dr lavanya<br>Lavanya.B.Savadatti         | Comparative Evaluation of Fracture Resistance of Maxillary Premolars Restored with or without Preheated Composite – An In Vitro Study                                                  |
| 4 | Hall 303<br>SESSION B | 757 | Dr CHINGANGBAM<br>BINDIYA                 | Direct Veneering : A Novel Approach                                                                                                                                                    |
| 5 | Hall 303<br>SESSION B | 156 | Dr VRUSHALI PADWAL                        | Impact Of Different Light Curing Units On The Mechanical Properties Of Bulk Fill Restorative Materials: A Systematic Review And Meta-Analysis Of Current Findings                      |
| 6 | Hall 303<br>SESSION B | 190 | Dr RUCHI SALUJA                           | A SEM study to compare and evaluate the marginal Microleakage in Non-Carious Cervical Lesions Restored with Composite Resin Using Three different adhesive systems – An In Vitro study |
| 7 | Hall 303<br>SESSION B | 484 | Dr BANDARU SRI<br>PRANEETH KRISHNA<br>SAI | Comparative Evaluation of Fracture Resistance in MOD Cavities Restored with Two Different Fiber-Reinforced Composites in Structurally Intact Teeth: An In Vitro Study                  |

|                                    |                       |      |                           |                                                                                                                                                                                  |
|------------------------------------|-----------------------|------|---------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 8                                  | Hall 303<br>SESSION B | 660  | Dr Ashima Mathur          | An In Vitro Comparative evaluation of effect of polyethylene fiber incorporated in resin composite on fracture resistance of teeth with MOD cavities.                            |
| 9                                  | Hall 303<br>SESSION B | 489  | Dr MUSKAN AGRAWAL         | Mouthrinses and Resin Composites: A Study of Microhardness Changes                                                                                                               |

| 5                                  | Hall 305<br>SESSION B | 238  | Dr SRIHARIHARAN M         | A COMPARATIVE EVALUATION OF MICROLEAKAGE OF CENTION N, COMPOSITE AND CONVENTIONAL GLASS IONOMER CEMENT IN CLASS V CAVITIES AN INVITRO STUDY.                                     |

|    |                       |      |                      |                                                                                                                                                                                                                                                                                                                                  |
|----|-----------------------|------|----------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 6  | Hall 305<br>SESSION B | 634  | Dr SANJANA KHATRI    | “Green dentistry” : Evaluating Eggshell slurry and Chitosan nanoparticles for enamel repair.                                                                                                                                                                                                                                     |
| 7  | Hall 305<br>SESSION B | 736  | Dr RAJNANDINI GOENKA | Comparative Evaluation of Polymerization Shrinkage and Color Stability of Injectable, Flowable, and Microhybrid Composites: An In-Vitro Study                                                                                                                                                                                    |
| 8  | Hall 305<br>SESSION B | 1391 | Dr Nafsy Salim       | Comparative evaluation of Surface roughness of a composite restorative material polished using two different polishing systems immediately and after 24 hours of curing: An in vitro study.                                                                                                                                      |
| 9  | Hall 305<br>SESSION B | 900  | Dr Shweta Chavan     | Bridging The Gaps With Beauty: Anterior Space Closure With Direct Composites                                                                                                                                                                                                                                                     |
| 10 | Hall 305<br>SESSION B | 738  | Dr KALYANI PAPALKAR  | Comparative Evaluation of Flexural Strength and Wear of Injectable, Flowable and Nanohybrid Composites: An In-Vitro Study                                                                                                                                                                                                        |
| 11 | Hall 305<br>SESSION B | 541  | Dr Gurpreet kaur     | Comparison of Remineralization Potential of CPP-ACP+F, Nanohydroxyapatite, Bioactive Glass (45S5), NaF+ Arginine and Evaluation of their effect on Enamel using Vickers test for Microhardness and Scanning Electron Microscope with Energy Dispersive Xray (SEM-EDX) Microanalysis for Elemental Composition: An In Vitro Study |

**SESSION B 11:00 AM- 1:00 PM**

|    |                       |       |                        |                                                                                                                                                          |
|----|-----------------------|-------|------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1  | Hall 306<br>SESSION B | 452   | Dr Pritie Sen          | Comparative Evaluation of Sealing Ability and Bond Strength in SDF-Treated Class II Cavities: An In Vitro Analysis                                       |
| 2  | Hall 306<br>SESSION B | 394   | Dr Astha Bhargava      | Comparative Evaluation of Compressive Strength, Diametral tensile Strength and Microhardness of three different restorative material - an in vitro study |
| 3  | Hall 306<br>SESSION B | 444   | Dr Ishan Bhagat        | Clinical performance of an open sandwich technique and direct composite resin in Class 2 restorations-SRMA                                               |
| 4  | Hall 306<br>SESSION B | 1357  | Dr Maria Jaison        | Effect of two commercial mouth rinses on microhardness of a nanofilled resin composite : An in vitro study                                               |
| 5  | Hall 306<br>SESSION B | 462   | Dr Khushi Dua          | Effect of Brushing with Conventional vs. Probiotic Toothpaste on the Color Stability of Preheated and Non-Preheated Nanocomposite Resin                  |
| 6  | Hall 306<br>SESSION B | 1395  | Dr VIDYA PATIL         | Heat & Heal: Enhancing Resin“Dentin Bonds with Preheating and Chitosan - An in vitro study                                                               |
| 7  | Hall 306<br>SESSION B | 1224  | Dr PEDDINENI VANISHA   | COMPARISON BETWEEN TWO TYPES OF MATRIX SYSTEMS FOR CONTACT TIGHTNESS IN CLASS-II COMPOSITE RESTORATIONS “ AN INVIVO STUDY                                |
| 8  | Hall 306<br>SESSION B | 842   | Dr S MADAN MOHAN REDDY | Influence of Fiber Reinforcement and Flowable Liners on Fracture Strength in MOD Cavities Restored with Universal Composite: An In Vitro Study           |
| 9  | Hall 306<br>SESSION B | 549   | Dr Anjali Shirke       | BOND INTEGRITY OF REPAIRED INDIRECT RESIN COMPOSITES : A MICROTENSILE STRENGTH STUDY                                                                     |
| 10 | Hall 306<br>SESSION B | 11521 | Dr mitali manwar       | Comparative evaluation of cuspal deflection of teeth with class II mesio-occluso-distal (MOD)                                                            |
| 11 | Hall 306<br>SESSION B | 397   | Dr SWATHI C            | Subgingival proximal caries management using Deep margin elevation                                                                                       |

**SESSION C 1:30 PM- 3:30 PM**

|   |                       |      |                     |                                                                                                                                                       |
|---|-----------------------|------|---------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Hall 301<br>SESSION C | 162  | Dr Chaitali Doshi   | lluminating the Invisible: Comparative Evaluation of Diode Laser and Curing Light for Transillumination in Detecting Tooth Cracks: An In Vivo Study.” |
| 2 | Hall 301<br>SESSION C | 1394 | Dr Nandini Gundawar | Indigenous Dentifrices and Their Impact on Restorative Materials :- An in Vitro study                                                                 |

|    |                       |      |                         |                                                                                                                                                           |
|----|-----------------------|------|-------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------|
| 3  | Hall 301<br>SESSION C | 771  | Dr p poojiteswari       | Comparative Evaluation of Fracture Resistance in Endodontically Treated Maxillary Premolars Using Fiber, Bulk-Fill, and Nano Composites – An Invito Study |
| 4  | Hall 301<br>SESSION C | 553  | Dr SACHIN MORE          | Comparative Evaluation of Fracture Strength of Two Indirect resin Composite Veneers after Aging: An In Vitro Study                                        |
| 5  | Hall 301<br>SESSION C | 1274 | Dr SREENIDHI MADHADI    | Enhancing Fracture Resistance in Non-Carious Cervical Lesions: A Invitro Study of Giomer Restorations with and Without Ribbond Fiber Reinforcement        |
| 6  | Hall 301<br>SESSION C | 706  | Dr AANUJA SINGHA        | Effect of Different Restorative Materials on Fracture Resistance of Endodontically Treated Mandibular Premolars with Class V Defect : An Ex-Vivo Study    |
| 7  | Hall 301<br>SESSION C | 1435 | Dr Aritra Kumar Samanta | From Core to Cusp: Reinventing Restoration with Fiber-Reinforced and Composite Resin Fusion                                                               |
| 8  | Hall 301<br>SESSION C | 1466 | Dr Shraddha Rathi       | Comparative Evaluation of the Effect of Various Cavity Disinfectants on Shear Bond Strength of Composite Resin to Dentin                                  |
| 9  | Hall 301<br>SESSION C | 1368 | Dr Anjana PS            | Effect of sugar substitute on surface roughness of composite resin: an invitro study                                                                      |
| 10 | Hall 301<br>SESSION C | 1448 | Dr Sathyam Bodike       | REHABILITATION OF ENDODONTICALLY TREATED TOOTH WITH ANATOMIC POST&CORE                                                                                    |
| 11 | Hall 301<br>SESSION C | 454  | Dr Rupasree Das         | Scanning Electron Microscopic Analysis of Dentinal Tubule Occlusion by Different Desensitizing Agents Before and After Acid Exposure: An In Vitro Study   |

**SESSION C 1:30 PM- 3:30 PM**

|    |                       |      |                     |                                                                                                                                                                           |
|----|-----------------------|------|---------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1  | Hall 302<br>SESSION C | 432  | Dr RIA CHAWLA       | An in vitro analysis of the effect of adjunctive use of ozonated oil with nano hydroxyapatite on remineralisation of incipient carious lesions .                          |
| 2  | Hall 302<br>SESSION C | 1409 | Dr Anagha C         | Comparative Evaluation of Shear Bond Strength of Composite Repaired Using Different Surface Conditioning Protocols: An In Vitro Study                                     |
| 3  | Hall 302<br>SESSION C | 552  | Dr PAWAN JAGTAP     | IN VITRO COMPARATIVE EVALUATION OF THE FRACTURE RESISTANCE OF PREMOLARS RESTORED WITH TWO DIFFERENT INDIRECT COMPOSITE INLAY RESTORATIONS.                                |
| 4  | Hall 302<br>SESSION C | 677  | Dr Monica R         | Comparative analysis of Fracture resistance of class II MOD cavities using Direct and Semi-direct short fibre reinforced resin restoration - an in vitro study            |
| 5  | Hall 302<br>SESSION C | 1376 | Dr Maryam Habib     | COMPARITIVE EFFICACY OF VARIOUS OXYGEN INHIBITING AGENTS ON NANOCOMPOSITE BY THE ANALYSIS OF MICROHARDNESS AND COLOUR STABILITY: AN IN VITRO STUDY                        |
| 6  | Hall 302<br>SESSION C | 574  | Dr Chinmay bhat     | EFFECT OF TEMPERATURE ON DEGREE OF CONVERSION OF RESIN COMPOSITES                                                                                                         |
| 7  | Hall 302<br>SESSION C | 1438 | Dr Debiprasad Bisoi | Case report- Conservative management of maxillary anterior carious lesion using direct composite restorations                                                             |
| 8  | Hall 302<br>SESSION C | 465  | Dr Sakshi Chandak   | The effect of preheating on microhardness and flexural strength of Giomer-based bulk-fill versus Conventional bulk-fill resin composites: an in-vitro study               |
| 9  | Hall 302<br>SESSION C | 607  | Dr ASNA JABIN PN    | Comparative evaluation of fracture resistance in large MOD cavities using fiber and fibre reinforced composite in maxillary premolars                                     |
| 10 | Hall 302<br>SESSION C | 1484 | Dr SAMSON S SAMUEL  | MANAGEMENT OF MIDLINE DIASTEMA USING COMPOSITE RESIN                                                                                                                      |
| 11 | Hall 302<br>SESSION C | 1478 | Dr Sabari nathan    | A SEM Evaluation of micro-leakage in Ribbond fibre reinforced composite, Ever X posterior, Filltek bulk fill composite in extensive class I restoration- An Invitro Study |

| SESSION C 1:30 PM- 3:30 PM |                       |      |                                |                                                                                                                                                                                               |
|----------------------------|-----------------------|------|--------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1                          | Hall 303<br>SESSION C | 247  | Dr Subreena Zahoor             | Comparative evaluation of microleakage in Class II Restorations using different materials in an open sandwich technique: An In-Vitro Stereomicroscopic study.                                 |
| 2                          | Hall 303<br>SESSION C | 420  | Dr SRIJIT PAUL                 | Brighten up your day with a brighter smile !!                                                                                                                                                 |
| 3                          | Hall 303<br>SESSION C | 1045 | Dr MUNDURU<br>GREESHMA         | Comparative Evaluation of Microleakage in Class V Cavities restored with Three Different Restorative Materials : An In vitro -Study                                                           |
| 4                          | Hall 303<br>SESSION C | 160  | Dr sagarika nandi              | Influence of Three Light-Curing Units on Resin Depth Polymerization: An In Vitro Analysis                                                                                                     |
| 5                          | Hall 303<br>SESSION C | 498  | Dr Saumya Kanode               | Topic - Comparative evaluation of Fracture resistance of three different dentin replacement materials in posterior class I cavity- An in vitro pilot study                                    |
| 6                          | Hall 303<br>SESSION C | 123  | Mr Krithi Tech                 | Lorem Ipsum is simply dummy text of the printing and typesetting industry.                                                                                                                    |

**SESSION D 3:30 PM-5:30 PM**

|    |                       |      |                       |                                                                                                                                                                                 |
|----|-----------------------|------|-----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1  | Hall 302<br>SESSION D | 1035 | Dr LALIT PATIL        | Comparative assessment of fluoride ion release, pre and post recharge among three advanced dental restorative materials: an in vitro study.                                     |
| 2  | Hall 302<br>SESSION D | 1347 | Dr ALLA SRIHARSHA     | Confocal Laser Microscopy Assessment of Microleakage in Class II Cavities: Evaluating Materials for Deep Margin Elevation                                                       |
| 3  | Hall 302<br>SESSION D | 1263 | Dr SHUBHANGI PODDAR   | Optimizing Resin – Dentin Bond strength using Dual approach of nHA pretreatment and adhesive integration: A Comparative in vitro evaluation                                     |
| 4  | Hall 302<br>SESSION D | 352  | Dr Darshana Bodkhe    | Systematic Review of Survival and Failure Patterns of Direct and Indirect Restorations in Patients with Bruxism.                                                                |
| 5  | Hall 302<br>SESSION D | 560  | Dr Anushree Nambiar   | Comparative Evaluation of Microhardness of Nano-Bioactive Glass Reinforced Glass Ionomer Cement and Nano-Bioactive Glass Reinforced Calcium Aluminate Cement: An In Vitro Study |
| 6  | Hall 302<br>SESSION D | 124  | Dr madhurima jain     | COMPARATIVE EVALUATION OF GINGIVAL DISPLACEMENT AND INFLAMMATORY RESPONSE USING DIFFERENT RETRACTION TECHNIQUES- A RANDOMIZED CONTROLLED TRIAL                                  |
| 7  | Hall 302<br>SESSION D | 1476 | Dr LINGAREDDY SRUTHI  | Compressive Strength Evaluation of MTA Powder Incorporated with Different Concentrations of Chlorhexidine Nanoparticles                                                         |
| 8  | Hall 302<br>SESSION D | 1466 | Dr Shraddha Rathi     | Comparative Evaluation of the Effect of Various Cavity Disinfectants on Shear Bond Strength of Composite Resin to Dentin                                                        |
| 9  | Hall 302<br>SESSION D | 1084 | Dr SAMIDHA CHAULLIWAR | Comparative Evaluation of Postoperative Sensitivity Following Restoration of Class I Cavity with Three Different Restorative Materials: An In-Vivo Study.                       |
| 10 | Hall 302<br>SESSION D | 1514 | Dr PRIYANKA CHAVAN    | TO COMPARE AND EVALUATE THE EFFICACY OF VARIOUS OXYGEN INHIBITION LAYER (OIL) MINIMIZING AGENTS ON MICROHARDNESS OF COMPOSITE RESIN: AN IN-VITRO STUDY                          |
| 12 | Hall 302<br>SESSION D | 724  | Dr ponakala vyshnavi  | COMPARISON OF FRACTURE RESISTANCE IN POSTENDODONTIC RESTORATIONS USING VARIOUS RIBBOND FIBERS PLACEMENT TECHNIQUES IN MOLARS -AN IN VITRO STUDY                                 |
| 11 | Hall 302<br>SESSION D | 1315 | Dr SOUNDARYALAHARI E  | Results of optimised bleaching in dental fluorosis: A Clinical assessment of Pola office with and without phosphoric acid – An in vivo study.                                   |
|    |                       |      |                       |                                                                                                                                                                                 |

**SESSION D 3:30 PM-5:30 PM**

|   |                       |      |                           |                                                                                                                                                                                                  |
|---|-----------------------|------|---------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Hall 303<br>SESSION D | 329  | Dr Rakhi Khurana          | Aesthetic & Functional Rehabilitation with injection moulding technique.                                                                                                                         |
| 2 | Hall 303<br>SESSION D | 1526 | Dr KEZIAH SUSAN ZACHARIAH | Assessment of Enamel Remineralization Capacity Using Natural and Commercial Agents: An invitro study                                                                                             |
| 3 | Hall 303<br>SESSION D | 1557 | Dr Aditya Ingale          | COMPARATIVE EVALUATION OF CUSPAL DEFLECTION OF MESIO-OCCLUSO-DISTAL CAVITIES IN MAXILLARY PREMOLARS RESTORED WITH SHORT-FIBER-REINFORCED COMPOSITE USING DIFFERENT TECHNIQUES: AN IN-VITRO STUDY |
| 4 | Hall 303<br>SESSION D | 698  | Dr Aditi Surana           | Evaluation of the Effectiveness of Oral Probiotic and Curcumin Lozenges in the Reduction of Microbial Load and Streptococcus Mutans in Saliva: A Clinical Study                                  |
| 5 | Hall 303<br>SESSION D | 898  | Dr MANAV MODI             | Mimicking Nature With Layers: Case Series On Stratified Composite Techniques In The Aesthetic Zone                                                                                               |
| 6 | Hall 303<br>SESSION D | 111  | Dr Sagar Arora            | COMPARATIVE EVALUATION OF SHEAR BOND STRENGTH OF ENAMEL SUBSTRATE AND CONVENTIONAL PULP CAPPING AGENTS TO RMGIC AND RESIN COMPOSITE: AN IN-VITRO STUDY                                           |

|    |                       |      |                                     |                                                                                                                                                                      |
|----|-----------------------|------|-------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 7  | Hall 303<br>SESSION D | 644  | Dr Anujin M                         | EVALUATION OF THE EFFECT OF TWO DIFFERENT MOUTHWASHES ON THE SURFACE MICRO-HARDNESS OF CENTION-N – AN INVITRO STUDY                                                  |
| 8  | Hall 303<br>SESSION D | 317  | Dr TARUNPREET DHAMI                 | In Vivo Evaluation of Cuspal Deflection in Premolars Restored with Three Posterior Composite Resins Using Incremental Technique: A Micrometer Screw Gauge Assessment |
| 9  | Hall 303<br>SESSION D | 714  | Dr KODALI.RAJYALAKSHMI NAGA VENNELA | UNVEILING THE THIRD EYE (A MAT – LAB Comparative analysis of image quality between DSLR and mobile dental photography using 100mm lens                               |
| 10 | Hall 303<br>SESSION D | 1130 | Dr Hetal Maheshwari                 | Bonded Right, Conserved Tight: A Case Series                                                                                                                         |
| 11 | Hall 303<br>SESSION D | 869  | Dr JASMINE KAUR                     | EVALUATION OF MICROLEAKAGE IN CLASS I COMPOSITE RESTORATION USING FOUR DIFFERENT TYPES OF ETCHING TECHNIQUES: A STEREOMICROSCOPIC STUDY                              |
| 12 | Hall 303<br>SESSION D | 1575 | DR. Arati Oswal                     | Comparative SEM Analysis of Three Surface Pretreatment Protocols on Adhesive Resin Infiltration and Bond Integrity in the Sandwich Technique: An In Vitro Study.     |
